COVID-19 VACCINATION
CONSUMABLES KIT

COVID-19 VACCINATION KITS
To ensure efficiency in COVID-19 vaccination programmes, IDA supports customers by sourcing and supplying the quality-assured items required, such as needles and syringes, safety boxes, alcohol swabs and required PPE.
For each COVID-19 vaccine we have developed a kit containing the quantities needed for a minimum of 1.000 doses to help our customers plan ahead.

Autodisable syringe versus regular syringe
WHO has recommended the use of AD syringes over regular syringes in vaccination campaigns.
IDA supplies both types, however regular syringes are offered at better price and leadtime, have better availability and cause less waste.
You may want to consider regular syringes for vaccination programmes if these syringes are part of the standard medical supplies at health centres and fall within the usage expertise of health care workers.

ASTRAZENECA
1000 doses

product code	description	unit of measure	quantity per kit
N705-N20-01	needle, luer slip disp. 23Gx1" (0.6x25 mm)*	100 pces	10
N701-105-01	syringe luer slip disp w/o ndl 1 ml*	100 pces	10
8405-002-01	alcohol swabs	100 pces	10
B023-045-01	adhesive woundplaster 72 x 19 mm	100 pces	10
8407-005-00	safety box carton to dispose used syringes + needles, 5 L	1 pce	10

* Upon request IDA can supply **N707-N07-01 autodisable syringe with ndl 23Gx1", 0.5 ml, 100 pces** as an alternative.

JANSSEN PHARMACEUTICALS
1000 doses

product code	description	unit of measure	quantity per kit
