

COVID-19

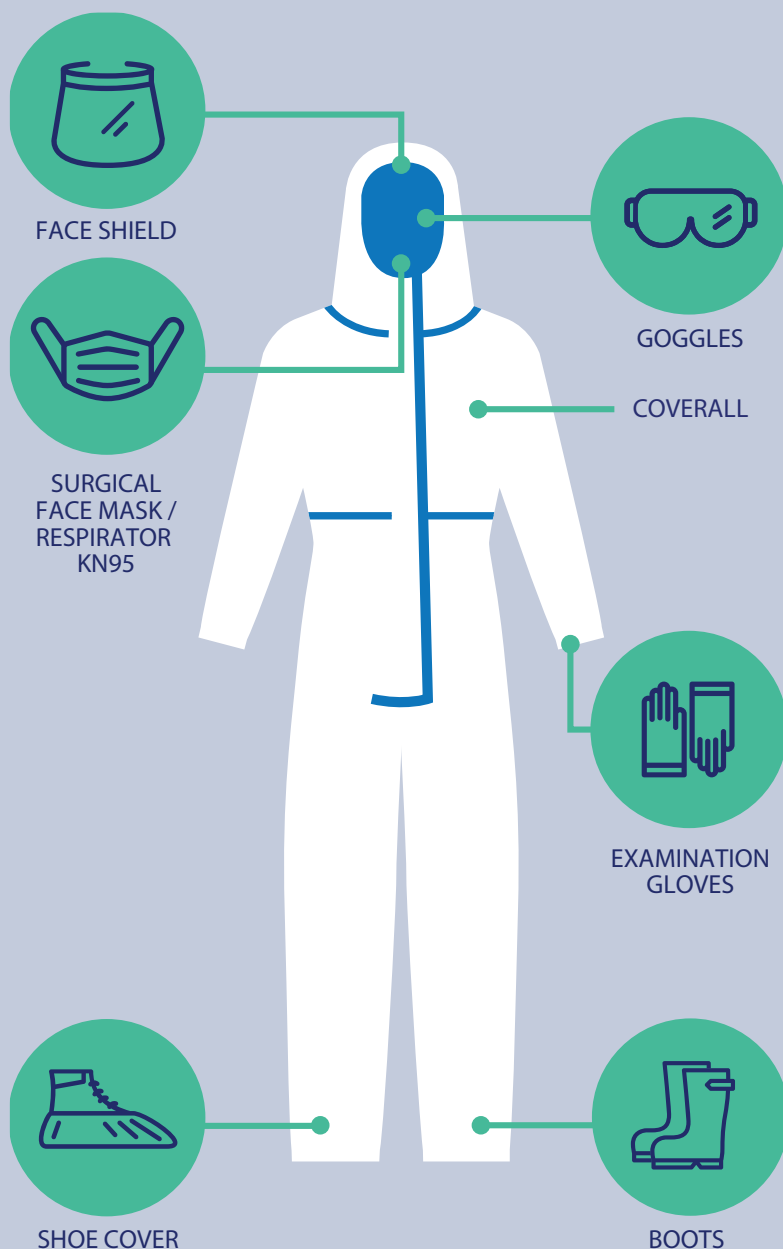

PORTFOLIO

Since the first COVID-19 outbreak at the end of 2019, IDA has been actively working on the sourcing of Personal Protective Equipment (PPE) products for COVID-19 response, anticipating upcoming global healthcare challenges, especially in low-and middle-income countries. Our focus is on ensuring people, particularly healthcare workers, are protected while doing their work.

In the countries where IDA is active, we see that access to the most essential products for the COVID-19 pandemic is insufficient, while cases of COVID-19 continue to rise. To support these needs, IDA Foundation has expanded its broad portfolio. Aside from PPE, diagnostics, oxygen concentrators, this also includes essential medicines, such as dexamethasone.

In addition to the continuous supply of COVID-19 related items, we are committed to supporting health organisations in low- and middle-income countries in the vaccine rollout, supplying the supporting medical materials and supplies needed for this major challenge.
