BRIDGING THE GAP IN  
ACCESS TO MEDICINES

## IDA KITS EXPERIENCE AND IMPACT

Working with international NGO's, UN organisations and intergovernmental organisations, IDA Foundation has gained extensive experience over the years by providing kitting solutions to help our customers execute emergency response projects, often under challenging circumstances in remote and hard-to-reach areas.

### Impact

In the last few years, we have helped our customers treat over 23 million patients by supplying IDA's kits to more than 50 countries, including the most recent WHO grade 3 listed emergencies\*, in Democratic Republic of Congo, Mozambique, Nigeria, Somalia, South Sudan, Syrian Arab Republic, Afghanistan, Yemen, Ukraine and Türkiye amongst others.

*\* Grade 3 emergency - A single country or multiple country emergency, with substantial public health consequences, requiring a major/maximal WHO response.*

### Interagency Emergency Health Kits (IEHK), Essential kits and Pediatric Severe Acute Malnutrition (PED-SAM) kits - Afghanistan

IDA produced 2,500 IEHKs, 120 PED/SAM kits and 228 pallets of essential kits for WHO's emergency response in Afghanistan. These kits, containing medicines and medical supplies, were produced in both our Tilburg and Dubai warehouses. From these locations they were shipped to WHO's logistics hub in International Humanitarian City (Dubai), for further dispatch to Afghanistan.

### KITS

Kits help create standardisation in healthcare delivery, resulting in efficient packing and delivery of medicines and medical goods: health care providers can be confident they will receive the right medicines and medical products to treat specific conditions.

### HEALTH EMERGENCIES

Kits provide essential health products in situations where health infrastructure is lacking. These include major events such as outbreaks of infectious diseases, conflicts, natural disasters, chemical or radio-nuclear events, and food contamination, that pose a serious threat on public health (systems) in-country or in the region.

# IDA CUSTOM-MADE HEALTH KITS PROJECTS

Next to the WHO-standardised health kits, IDA also offers custom-made kits on request. We help our customers with the composition and selection of the right kit content to meet their specific requirements. We have executed many projects over the years, varying in complexity in terms of products, end destinations or kitting operations. The following projects are examples of some of the complex custom-made assignments we have worked on.

## **RRK (Rapid Response Kit) - South Sudan**

IDA assembled over 600 Rapid Response Kits (RRKs) for one of our main customers, to specifically support primary healthcare needs in 8 different remote locations in Sudan. Each kit, containing 60 quality-assured essential medicines and 15 medical supplies, can cover the needs of around 3,000 people for about three months. Close to 2 million people received medical treatment with the supply of these kits.

## **APE (Agente Polivalente Elementar) kits - Mozambique**

IDA supplied 55,000 kits to support basic healthcare workers (APE) in offering first aid and related health care to patients in community health centres all over the country. The kits, containing 22 different medicines and medical supplies, were delivered in customised water-proof packaging specifically designed for transport to remote areas.

## **Essential Health Kits - Papua New Guinea**

This delivery was based on 4 types of kits containing essential medicines and medical supplies to be used in 2,726 community health facilities across Papua New Guinea, with each health kit containing enough medicines and supplies for the treatment of 5,000 patients for 4 months. A total of 400 x 20ft containers were shipped in 5 rounds with a two-month delivery interval. The deliveries were prepared for 20 provinces with 6 different ports of destination.

## **Severe Malaria Treatment kits - Burkina Faso**

IDA supplied Severe Malaria Treatment (SMT) kits to Burkina Faso. The project involved two kits with customised packaging; a Pregnant Women SMT kit and a Children SMT kit. Each kit, designed to treat one patient, contained 11 different medicines and medical supplies. We delivered 93,000 SMT-kits in total, split in to 10,000 Pregnant Women kits and 83,000 Children kits, in one single shipment of 29 x 40ft containers.

## **Antimalarials replenishment - South Sudan**

IDA was asked to help on a push-replenishment project in South Sudan for antimalarials needed for various health care levels - from referral hospitals to primary health care units. The medicines were delivered as kits, with the necessary quantity and packaging per health care type and supplied with three-month intervals as requested.

## **Essential Health Kits - Congo**

IDA successfully carried out a procurement project for essential medicines and medical supplies to 6 different regions in DR Congo. The project involved 105 items, packed in customised boxes per region, sourced from 45 different manufacturers from 13 different countries. The challenge was to ensure one single sea shipment per region for the bulk items, with a total of 27 x 40ft containers, and one single air shipment per region for cool-and psychotropic items.

## **Malaria kits - Congo**

IDA executed a procurement project for antimalarials, to be delivered to 4 different provinces in DR Congo. The project involved 13 items, sourced from 9 different manufacturers from 4 different countries. Each product was packed in customised boxes, providing maximum efficiency for onwards inland distribution of the products to the different regions.

### **STANDARDISED HEALTH KITS**

IDA supplies the following kits that are designed according to WHO requirements, and/or UN and humanitarian agencies requirements.

All kits follow a modular set-up and can be ordered as a kit or as separate modules.

- Interagency Emergency Health Kit (IEHK) 2017
- Cholera kits 2020
- Pediatric kit incl. SAM/MC Children - WHO PED/SAM 2020
- Measles kit 2021

### **CUSTOMISED HEALTH KITS**

Examples of custom-made kits we have assembled over the years:

- Rapid Response Kit (RRK)
- Essential Drugs Kit
- PEP Kit
- Nutrition Kit
- Malaria Kit (children & pregnant women)
- Midwifery Kit
