

PED/SAM

KIT 2020

KIT

INFORMATION

The PED/SAM kit is specifically designed for children and provides suitable medicines, renewables, and equipment to treat common childhood illnesses including severe acute malnutrition (SAM) with medical complications (MC).

One kit can treat 50 children with severe acute malnutrition and medical complications. The kit can also be used in paediatric wards (10-15 beds) for 3 months.

PED/SAM KIT MODULES

Medicine SAM/MC module

Contains medicines suitable for SAM children with medical complications according to the WHO treatment guidelines. Medicines in this module are to treat about 50 SAM /MC children. *This module does not contain any HIV, TB or anti-cancer medicines, nor food or therapeutic milk.*

The module should only be used by health care providers working in hospitals or stabilisation centres, whose staff have received training on the appropriate management of severe acute malnutrition with medical complications.

Medicines PED oral module

Contains the medicines (oral and topic) most commonly used in a paediatric ward and recommended for the treatment of major common paediatric diseases. The medicines in this module are to supply for a 10-bed paediatric unit for about 3 months. *This module does not contain any HIV, TB or anti-cancer medicines.*

Medicines PED injectables module

Contains the most commonly used injectable medicines in the paediatric ward. The module also includes IV fluids. The medicines are to supply for a 10-bed paediatric unit for about 3 months.

Medicines PED controlled module

Contains controlled medicines such as diazepam, morphine, and midazolam in paediatric formulations. An import license permit from the Ministry of Health is mandatory to be able to receive this module.

Medicines Malaria module

Contains malaria oral and injectable medicines. The medicines in this module are to treat about 150 cases of non-complicated malaria (60 babies and 90 infants).

Supplies and renewables module

Contains supply and renewables such as gauze, bandages, syringes, IV line and reusable surgical tunic. This module goes along with the medicines PED injectables module.

Equipment module

Contains various equipment such as a scale, stethoscope, glucometer and a haemoglobinometer starter kit.

Glucometer module

Contains a glucometer with 300 strips and 300 lancets. The module can be used in the paediatric ward or can be given to one diabetic patient.

Source: World Health Organization

IDA MODULE CODES

The kit follows a modular set-up and can be ordered as a complete kit or as separate modules.
