

PRODUCT LIST

NUTRITION

IDA'S NUTRITION PRODUCT RANGE

To complement IDA's maternal and child health portfolio we have added high-impact commodities such as nutritional products for pregnant women and children to our range. These products include ready-to-use supplementary food (RUSF) and ready-to-use therapeutic food (RUTF) which are used for the care and treatment of children with moderate and/or acute malnutrition. For severe acute malnutrition with medical complications, we can offer the WHO PED/SAM 2020 kit. As these kits are primarily produced for WHO, general availability is limited*.

WHY ORDER WITH IDA

The high-quality nutrition products offered by IDA are available from multiple sources allowing us to order these products for our customers with competitive pricing, short lead-times and smaller quantities if required. We take care of the full supply chain - from order to delivery. Product samples can be shipped upon request.

IDA'S QUALITY SYSTEM

We believe that health providers worldwide must have confidence in the quality of the products they give to their patients. To ensure our customers receive the best products and services, we have a comprehensive Quality Assurance system in place.

Our process includes risk assessment of production sites, review of product dossiers, and evaluation of the product's past performance, safety, and efficacy.

In addition, we provide our suppliers with auditing and advice, so that they can meet our high standards. With these processes in place, we can guarantee that our products and services are of the highest quality. Our sources for RUSF and RUTF products are UNICEF approved.

** Please consult your IDA sales representative for more information and available options.*

HOW TO ORDER

To order products please contact your IDA representative or local IDA Foundation agent or distributor. To become an IDA customer you can register via Customer Registration on IDA's homepage.
